This report, based on KEYHOLE photography, supplements NPIC/R-97/64, 1, pertaining to the Ukmerge MRBM Complex, which previously consisted of 2 Type 1 MRBM launch sites and 1 fixed field launch site (Figure 1).

Fixed Field Site No 2 is situated in a forested area of approximately 450 feet elevation and is located 9.5 nautical miles (nm) east-southeast of Ukmerge over a loose-surfaced, secondary road network. The field site is 14.5 nm (straight line distance) northeast of Vepriai Launch Site; 12 nm (straight line distance) east-northeast of Ukmerge Launch Site; and 11.9 nm (straight line distance) northeast of Fixed Field Site No 1.

25X1D The field site was first seen in [REDACTED]
25X1D [REDACTED] when it was identified
25X1D as being complete. When seen in [REDACTED]
the site consisted of 2 confirmed launch

positions and 2 probable launch positions (Figure 2). All 4 positions are linear aligned on an azimuth of approximately 220 degrees. Several small clearings are inter-connected with the 4 positions by numerous roads and trails, some poorly defined. The field site has remained in generally the same configuration, with no major changes from [REDACTED]

The field site can be negated with [REDACTED]. Two clearings were present within the field site area prior to [REDACTED] however, it is considered that they were not then missile related. These clearings could be seen as early as [REDACTED] and cannot be negated, because of lack of prior coverage.

The rail-to-road transfer point for this field site probably is located in Ukmerge.
